

How To Use The Solar Calculator

This calculator makes it easy for anyone to estimate the cost and payback of installing solar in your area. This short guide will explain how to use the tool.

Use the input form to calculate your estimates

1. To get started, click on the “Get Started” button on the solar calculator homepage and answer the questions displayed on the input form
 2. Clicking on the “Advanced Options” button will display additional questions related to your specific needs. If you know the answers to any of these optional questions, enter them in the spaces provided
 3. Click on the “Calculate Estimates” button to see your solar estimates
-

Print your estimates

1. Once you have calculated your estimates, click on the Print icon within the “Solar System Estimates” section
 2. You can either select to print your solar estimates to a printer or print to a PDF file
-

Access the solar calculator through a mobile device

1. Click on the web browser app on your phone or tablet
2. Type in the following URL to access the solar calculator home page:
<https://edt.tva.gov>
3. Please be patient while the page loads. For the best experience, use landscape mode on your device
